Museum receives Winter Storm Recovery grant

August 12, 2021

The Museum of the Coastal Bend has received a Humanities Texas Winter Storm Recovery Grant.

As a result of damages caused by the February 2021 ice storm, the museum had to replace seven light pole banners. These banners are located near the parking lot and along the exterior approach to the museum's front doors, and are critical to attracting and directing visitors. This included gallery tours that couldn't take place during the closure caused by the storm the week of February 15-19. Fortunately, this grant reimburses the cost of the banners MCB replaced.

This program is made possible in part by a grant from Humanities Texas, the state affiliate of the National Endowment for the Humanities.
